

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Rathbone Quercus Growth Fund

A sub-fund of the Rathbone Quercus Fund (OEIC)

Authorised Corporate Director: Rathbone Unit Trust Management Limited

Income shares ISIN: GB0031663965

Objectives and investment policy

We aim to deliver a greater total return than our benchmark (made up of 40% FTSE 100 Index; 16% FTSE North America Index; 8% FTSE Developed Europe excluding UK Index; 6% FTSE Japan Index; 6% FTSE AW Asia Pacific excluding Japan, Australia, New Zealand, India and Pakistan Index; 4% FTSE Emerging Markets Index; 20% Bank of England Base Rate), after fees, over any 10-year period. Total return means the return we receive from the value of our investments increasing (capital growth) plus the income we receive from our investments (interest and dividend payments). We use our benchmark as a target for our funds return because the benchmark's composition reflects the geographic and economic sectors we invest in.

We invest globally in a mixture of shares, bonds and funds. We buy UK, European and US shares and corporate and government bonds rated AAA to BBB- both directly and using funds. Shares and bonds listed outside the UK, Europe and the US, and bonds with a credit rating lower than BBB-, are held through funds alone. We also use funds to invest in specialist strategies and commodities. These funds are either actively managed to meet an objective or passively managed to track a price or index.

We don't hold more than 20% in cash, although we can, in extreme circumstances, take our effective cash level higher by investing in cash-like assets such as short-term deposits and government debt.

We actively manage our fund, which means we can choose what we invest in as long as it's in line with the investment objective and policy. Because of this, our fund's performance can diverge significantly from its benchmarks over shorter periods of time and therefore isn't appropriate for investors who plan to withdraw their money within 10 years.

Our fund is designed for investors with a basic knowledge of multi-asset funds who seek growth. You should intend to invest for longer than 10 years, understand the risks of our fund and have the ability to bear a capital loss.

You can buy and sell shares on each business day of the fund between 9am and 5pm.

The fund offers income shares (shares in which any dividends received are paid to the shareholder).

Risk and reward profile

This indicator is a measure of the fund's past volatility (the extent and rapidity of up-and-down movements of the value of an investment). It may not be a reliable indication of the fund's future risk. The risk category shown is not a target or a guarantee and may change over time.

The risk indicator for this fund reflects the following:

- As an asset class, shares have greater risk than either bonds or money market instruments.

The value of investments in the fund and the income from them may go down as well as up and you may not get back your original investment when you sell your shares.

During unusual market conditions, the risks normally experienced by the fund may increase significantly, and in addition, the fund may be subject to the following risks:

Counterparty risk: A company that we deal with may renege on its obligations, costing you money.

Currency risk: We own assets valued in a currency other than sterling. Changes in the price of foreign currencies can result in gains or losses, even if underlying asset prices stay the same.

Credit risk: Bonds that we own can become more or less creditworthy and will fluctuate in value resulting in gains or losses. Bonds that we own may fail to meet their legal obligations, such as missing an interest payment. This is known as a 'default' and will result in a loss.

Liquidity risk: Some assets become hard to sell at their expected price. This could mean we have to sell assets below their expected price resulting in a loss. In extreme circumstances, we may suspend the fund to protect your investment, resulting in you being unable to access your money.

Management risk: People make the investment decisions for our fund. If they make unfavourable decisions, you could lose money.

Operational risk: We rely on complex systems to ensure that trades are completed, our fund's assets are accounted for and that you can buy or sell our fund. If our systems fail, you could be inconvenienced or lose money.

Charges for this fund

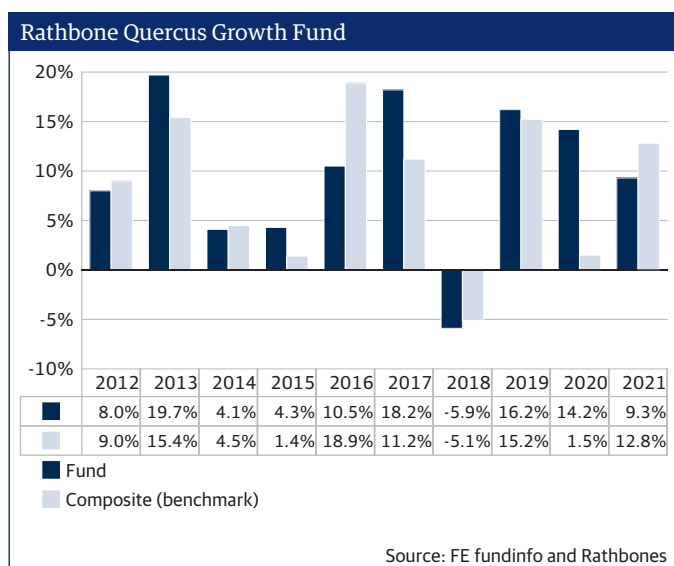

The fund manager receives an annual fee, which is included in the ongoing charges shown below. You may be eligible for lower entry charges than the maximum shown; ask your financial adviser. Ongoing charges are the same for all investors in the same class. The charges shown below are based on actual fees and expenses for the half-year ending 30 June 2022.

One-off charges taken before or after you invest:	
Entry charge	5.50% (Maximum)
Exit charge	none
Charges taken from the fund over a year:	
Ongoing charges	1.09%
Charges taken from the fund under specific conditions:	
Performance fee	none

For more information about charges, please see the "Charges" section of the fund's Prospectus, available by calling the Information Line or emailing rutm@rathbones.com.

Past performance

Basis of performance: Price performance based upon mid to mid price. Past performance is reported on a full calendar year basis. The fund was launched on the 25 April 2002.

Past performance should not be seen as an indication of future performance.
